

# Sidney Area Improvement Project

## open house

**DATE:** Tuesday, May 19, 2026  
**TIME:** 5:00 PM - 7:00 PM  
**LOCATION:** Shelby County Fairgrounds  
Clopay Beige Building  
655 S Highland Avenue, Sidney, OH 45365

AES Ohio is proposing to build approximately eight miles of double circuit 138 kilovolt (kV) transmission line. These lines will connect the existing Shelby Substation, east of Sidney, to the proposed Millcreek Substation Expansion, south of Sidney. These new transmission lines will introduce an additional energy source into the Sidney area. Additionally, these facilities will provide operational flexibility for preventative maintenance on other transmission lines and transmission substation equipment in the region.

The [open house](#) is a great opportunity to meet and talk with project representatives and view detailed project maps.

**Meeting format:** Project information will be on display boards set up around the room with project representatives available to answer questions. Attendees can drop in at their own convenience. There is no formal presentation.

We look forward to meeting with the community to answer questions, discuss project updates, and the permitting process. Light refreshments will be provided.
