Naomi Grace Macmanus

After graduation, I plan to attend Texas A&M University and major in Biology. I plan to further my education to become a therapeutic optometrist and run my own practice. I would like to tell future seniors to make the most out of your senior year and learn to live in the present moment. I have a passion to make a lasting impact in others' lives through service, leadership, and compassion. I would not be where I am today without my family, friends, and teachers who have sacrificed so much, and, most importantly, God.

Briana Nicole Cavazos

I plan to attend the University of Texas to major in Chemical Engineering and minor in Business. I have hopes to travel and study abroad, and one day be a project lead in my field. I want all current and future students to know that your story is yours and you have the power to write whatever you want in its chapters. I would like to thank anyone who has ever gifted me advice and support in all that I do. Most of all, I want to thank God for all the blessings He has presented me with. "God is within her, she will not fail." -Psalm 46:5

Julia Rose Percy

After graduation, I plan to attend Texas A&M University and major in Mechanical Engineering in my pursuit to become an automotive engineer. To the future seniors, "do your work ALWAYS!!!" I would like to thank my parents for allowing me to have big dreams and for pushing me to achieve them, my grandparents for teaching me my times tables in 2nd grade, and my sister for always being honest. I leave you with a bar to push higher or jump over and raise the standards. Remember to always try your best. You must do all things with or without motivation.

Ashlynn D'anne Burns

I plan to attend Texas A&M University to study Forensic and Investigative Science. I strive to choose a career that helps others and I plan to one day pursue a doctorate degree. To future HHS seniors: don't be afraid to step out of your comfort zone, and remember that God has a plan for you. I'd like to thank my friends and my family for sticking by my side, and my brother who got me through it all; my first best friend.

I am driven by my passion for travel. I hope to one day have the money to travel the world. "My flesh and my heart may fail, but God is the strength of my heart and my portion forever." -Psalm 73:26

Mia Melinda Dorado

After graduation, I plan to attend the University of Texas and major in Environmental Science. My future plans consist of doing hands-on work, hopefully around the world, as an ecologist. I am driven by my family and friends as they provide never ending support and love to keep me moving forward on my journey. I'd like to thank my teachers for their patience and knowledge, but also my family for their consistent guidance and support. I love enjoying the natural features the world has to offer, and I hope to keep them around for future generations to admire as well. "It always seems impossible until it's done." -Nelson Mandela

Nathan Thomas Mowers

I plan to attend the University of Texas Rio Grande Valley to study Cello Performance in hopes of being a professional orchestral musician. My ultimate goal is to perform with the New York Philharmonic. To the future seniors I say, just constantly set goals for yourself and have the determination to reach said goals. Always have something to motivate you to help you push yourself. Not everyone is as privileged in the world as we are. Even if it gets difficult, don't throw away your life. There is always light at the end of the tunnel, sometimes you just have to choose to see it. I would like to thank my mom, grandma, and brothers who have been there with me through the good and the bad.

Stephen Alexander Venegas

After graduation, I plan to attend Ohio State University to obtain a degree in Mechanical Engineering. I am driven by my family, friends, and my longing for the best life I can achieve. To our future seniors: just make sure that you take your grades serious and believe in yourself even when other people might not. Do not take anything for granted in life. Use everything that you have and don't hate others for what they have. Different circumstances make us who we are. We all receive a different deck of cards; it is just about how we use them. I would like to thank my parents for leading me along the right

path in life. They have always made sure that I am okay and am able to give it my all.

Ethan Timothy Mowers

I plan to attend the University of Texas Rio Grande Valley to obtain my Bachelor's Degree in Environmental Science with a focus on marine conservation. I am driven by a desire to be successful and to contribute to protecting the world around me. For our future seniors: set goals to work towards, but remember to have fun along the way. I leave you with the wisdom that time passes quickly and that you should make the most of it. I'd like to thank my family for encouraging me and mentors like Mrs. Muniz, Mrs. Wiley, Mrs. Saldivar, Mr. Oelerich, and Mr. Longoria for always motivating me to do my best. "May your days be many and your troubles be few." -Irish Blessing

Grace Evelyn Reed

After graduation, I plan to attend Lubbock Christian University to major in Psychology. I aspire to become a Psychologist and one day open my own practice. I would like to thank God for giving me the ability to do these things, and also thank my family, friends, coaches, and teachers. High school is supposed to be one of the most fun times of your life so don't waste time worrying about the things you cannot control. Trust in God and be worry free. I am driven by my family's success and wanting to make my peers and family proud. "Have I not commanded you? Be strong and courageous. Do not be afraid; do not be discouraged, for the Lord your God will be with you wherever you go." -Joshua 1:9

Jace Hollis Kushner

I plan to attend Oberlin College to study Pre-Med and play baseball at the collegiate level. I aspire to play baseball professionally after college. After baseball, I plan to attend medical school and settle down with my future family. To our future seniors: stay driven. Don't become complacent. Anything and everything is possible within yourself and what you believe in. Go and take what you believe is yours. You can do it. I would like to thank my mom, dad, sister, GiGi and all the coaches I've had growing up. They are the reason I continue going forward. They have ultimately made me the man I am today, and created a firm foundation in my life, setting me up for a great future.
